Published 19 October 2016

**Information and technology**  
**for better health and care**

This information standard (SCCI0084) has been approved for publication by the Department of Health under [section 250 of the Health and Social Care Act 2012](#).

Assurance that this information standard meets the requirements of the Act and is appropriate for the use specified in the specification document has been provided by the Standardisation Committee for Care Information (SCCI), a sub-group of the National Information Board.

This information standard comprises the following documents:

- Requirements Specification
- Change Paper
- Implementation Guidance.

An Information Standards Notice (SCCI0084 Amd 105/2015) has been issued as a notification of use and implementation timescales. Please read this alongside the documents for the standard.

The controlled versions of these documents can be found on the [NHS Digital website](#). Any copies held outside of that area, in whatever format (e.g. paper, email attachment), are considered to have passed out of control and should be checked for currency and validity.

# 1 Overview

This document provides the requirements and conformance criteria to test that the product, system or service complies with the requirements to support the local implementation of the OPCS Classification of Interventions and Procedures, Version 4.8, also known as OPCS-4.8.

This update to the standard is a continuance of the regular review and uplift of OPCS-4 in line with the recommended best practice of keeping clinical classifications aligned with advances in health care.

## 2 Summary of the standard

This table below contains a summary of the information standard:

Standard	
SCCI unique identifier	SCCI0084 Amd 105/2015
Title	OPCS Classification of Interventions and Procedures Version 4.8
Description	<p>OPCS-4 is a Fundamental Information Standard, mandated for use by health care providers. It is used to classify hospital interventions and surgical procedures to support various data collection for operational and secondary uses.</p> <p>It is mandatory for Admitted Patient Care Commissioning Data Sets (CDS).</p> <p>The Clinical Classifications Service (CCS) has responsibility for the support, maintenance, development and licensing of the OPCS-4 which is governed by Crown Copyright.</p> <p>The classification comprises a list of alphanumeric codes organised into mainly anatomically based chapters. It is published as a book set (Tabular List and Index) by The Stationery Office (TSO) and is also available to download as an eVersion.</p>
Applies to	<p>All Health Care Providers that are required to submit data on interventions and procedures for:</p> <ul style="list-style-type: none"> <li>• Admitted Patient Care Commissioning Data Sets (CDS)</li> <li>• Central Returns for secondary uses</li> <li>• Other data collections as defined in the NHS Data Model and Dictionary.</li> </ul> <p>Implementation of the change to this information standard impacts all health IT systems suppliers providing systems to the above providers; such providers should work with their suppliers to determine necessary changes.</p>
Release	
Release title	OPCS Classification of Interventions and Procedures Version 4.8 (OPCS-4.8)
Description	OPCS-4.8 is released by the NHS Digital Clinical

	Classifications Service and contains updates submitted by the NHS, NHS Digital, DH, NHS England and other organisations via the OPCS-4 Requests Portal.
Implementation Completion date	1 April 2017

## 4 Requirements for Health Care Providers

High quality relevant data is a key commissioning tool. The requirements set out below will help organisations to meet data quality requirements to support their business and deliver better care to patients.

#	Requirements <sup>1</sup>
1	All consultant episodes and day cases that contain interventions/operations MUST be recorded to OPCS-4.8 on or after 1 April 2017 (see # 6 below) and until further notice to support mandatory data collections including Admitted Patient Care Commissioning Data Sets (CDS), other Central Returns and data collections as detailed in the NHS Data Model and Dictionary ( <a href="http://www.datadictionary.nhs.uk">http://www.datadictionary.nhs.uk</a> ).
2	All Health Care Providers that are required to submit interventions/operations for Admitted Patient Care Commissioning Data Sets (CDS), Central Returns for secondary uses as well as a number of other data collections as defined in the <a href="#">NHS Data Model and Dictionary</a> MUST implement the updates in readiness for implementation on 1 April 2017.
3	Health Care Providers MUST implement OPCS-4.8 data files for 1 April 2017 as described in the OPCS-4 Metadata file specification available via the Technology Reference data Update Distribution Service (TRUD).
4	Health Care Providers MUST use the OPCS-4.8 classification and associated classification coding standards available in the National Clinical Coding Standards OPCS-4.8 reference book.
5	Health Care Providers MUST conform to the “output” specification as provided in the <a href="#">NHS Data Model and Dictionary</a> .  See Appendix 1 for list of data set flows.
6	Health Care Providers MUST apply OPCS-4.8 to all applicable Consultant Episodes that finish on or after 1 April 2017.
7	Health Care Provider Systems MUST support the clinical coding of consultant episodes in OPCS-4.7 and OPCS-4.8 as part of the transition to the updated classification.  See section 5: Requirements for NHS IT Systems: rows three and four for details of transition.
8	Health Care Providers SHOULD retain reference copies of all previous versions of OPCS-4.
9	Health Care Providers MUST continue to abide by the guidance that regulates the submission of Commissioning Data Sets (CDS) to <a href="#">Secondary Uses Service (SUS)</a> .
10	Health Care Providers SHOULD conform to <a href="#">SCCI0160 Clinical Risk Management: its Application in the Deployment and Use of Health IT Systems</a> and <a href="#">SCCI0129 Clinical Risk Management: its Application in the Manufacture of Health IT Systems</a> , if implementing OPCS-4.8 requires a new release of your software.

<sup>1</sup> The key words MUST, SHOULD and MAY are defined in the information standards development methodology. They follow [RFC-2119](#).

11	Health Care Providers MUST comply with the <a href="#">Licence</a> Agreement which is available on <a href="#">TRUD</a> (Technology Reference data Update Distribution).
----	--

## 5 Requirements for NHS IT Systems

#	Requirements
1	NHS IT systems/software MUST use the data files and associated specifications released via <a href="#">TRUD</a> to support the requirements listed below.
2	All systems that use OPCS-4 codes to support Admitted Patient Care Commissioning Data Sets (CDS), Central Returns for secondary uses as well as a number of other data collections as defined in the NHS Data Dictionary and listed at Appendix 1 MUST be updated to OPCS-4.8 in line with the implementation date of 1 April 2017.
3	Systems MUST support the coding of consultant episodes finishing on or after 1 April 2017 in OPCS-4.8.
4	Systems MUST support the coding of consultant episodes finishing on or before 31 March 2017 in OPCS-4.7 or earlier versions as appropriate.
5	Where a Hospital Provider Spell contains episodes before and after 01/04/17 the system MUST be able to support the use of both versions – OPCS-4.7 for episodes that end before 1/4/2017, and OPCS-4.8 for episodes that end on or after that date.
6	System outputs MUST continue to abide by the guidance that regulates the submission of Commissioning Data Sets (CDS) to <a href="#">Secondary Uses Service</a> (SUS).
7	IT systems that support SNOMED CT enabled sites MUST use the April 2017 Terminology Release Cross-maps, issued in mid-March 2017 via <a href="#">TRUD</a> (Technology Reference data Update Distribution) to support the above requirements.
8	Information systems MUST have integrity checks and validations to support data accuracy. Validation failures will be reported by the system in order to check for the entry of an incorrect OPCS-4 code or the display of an incorrect patient record. It is envisaged that checks will be performed via the User Interface or other methods appropriate to locally agreed clinical coding practice which ensures data integrity and compliance. See OPCS-4.8 Metadata file specification, available via <a href="#">TRUD</a> , for information on integrity checks and validations.
9	IT systems SHOULD conform to <a href="#">SCCI0160 Clinical Risk Management: its Application in the Deployment and Use of Health IT Systems</a> and <a href="#">SCCI0129 Clinical Risk Management: its Application in the Manufacture of Health IT Systems</a> , if implementing OPCS-4.8 requires a new release of your software.
10	Users of OPCS-4 MUST comply with the <a href="#">Licence</a> Agreement which is available on <a href="#">TRUD</a> (Technology Reference data Update Distribution).

## 6 Conformance Criteria for Systems

#	Conformance	Yes/No
1	The OPCS-4.8 electronic data files exist on systems that are used to support consultant episodes, day cases and other data sets specified in the NHS Data Dictionary that require the recording of hospital interventions and procedures from 1 April 2017 and until further notice.	
2	The OPCS-4.7 to OPCS-4.8 code changes listed in the <a href="#">Summary of Changes*</a> document have been implemented and are available to the clinical coding function to code the relevant procedures present in the patient medical record.  *The Summary of Changes from OPCS-4.7 to OPCS-4.8 is also issued in the OPCS-4.8 <a href="#">TRUD</a> pack and lists new and changed codes.	
3	Codes and descriptions new to OPCS-4.8 <u>are present</u> in the 2017/2018 (and until further notice) Commissioning Data Sets (CDSs) and central returns where the applicable operations exist in the patient medical record.	
4c	Codes and descriptions new to OPCS-4.8 are <u>not present</u> in the 2016/2017 Commissioning Data Sets (CDSs) and central returns.	
5	Systems permit coding to OPCS-4.7 and OPCS-4.8 to support the transition to the updated classification.	
6	Where a Hospital Provider Spell contains episodes before and after 01/04/17 the system supports the use of both versions as expressed in the requirements.	
7	The OPCS-4 codes residing within the Hospital Information System are valid for the relevant year(s), for example, OPCS-4.6 in use at 1 April 2011 – 31 March 2014.	
8	Clinical Coding systems disallow the use of retired codes after the date of retirement. The codes will continue to be available for coding and analyses of data collected before date of retirement.	
9	Data coded to OPCS-4.8 conforms to the metadata parameters as specified in the OPCS-4.8 Metadata file specification available via TRUD.	
10	CDS data continues to flow to SUS without any debasement of content.	
11	OPCS-4.8 is available from implementation date (see above) until further notice.	
12	Patient data coded to OPCS-4.7 and previous versions SHOULD	

	continue to be available for analyses.	
13	OPCS-4.8 codes derived from the terminology cross-maps conform to the above conditions, where applicable.	
14	OPCS-4.8 codes, assigned by classification encoders, conform to the above conditions, where applicable.	
15	Patient Information Systems conform to the classification definitions provided in the NHS Data Model and Dictionary.	

## 7 Conformance Criteria for Users

#	Conformance	Yes/No
1	Clinical coders are familiar with the changes in OPCS-4.8, and have attended training courses where provided, before using the new version.	
2	Clinical coders are aware of the changes that affect their specialties and have liaised with clinicians, as necessary.	
3	Clinical coders are using OPCS-4.8 for the coding of all Consultant Episodes (Hospital Provider) that finish on or after 1 April 2017.	
4	Clinical coders have informed senior management where their clinical coding applications have not been updated to OPCS-4.8.	
5	Clinical coders are using the latest National Clinical Coding Standards OPCS-4.8 reference book for the coding of all Consultant Episodes (Hospital Provider) that finish on or after 1 April 2017.	
6	NHS Digital Clinical Classifications Service Approved – NHS and Commercial Clinical Coding Trainers are using the updated national clinical coding courses and/or have developed/updated their in-house courses in line with the documentation supplied by the Clinical Classifications Service.	
7	NHS Digital Clinical Classifications Service Approved – NHS and Commercial Clinical Coding Auditors use OPCS-4.8 when undertaking data quality inspections of all Consultant Episodes (Hospital Provider) that finish on or after 1 April 2017.	
8	Analysts/statisticians use the Table of Coding Equivalences (ToCE), available in the OPCS-4.8 TRUD pack, for longitudinal analysis for data coded to previous versions of OPCS-4.8	
9	All OPCS-4 users MUST familiarise themselves with OPCS-4.8 and assess the impact on their work.	

## 8 Conformance criteria for Clinical Classifications Service

This section describes the tests to be performed to indicate that the information standard is supported by the NHS Digital Clinical Classifications Service.

#	Conformance	Yes/No
1	Advance Notification of change to the standard issued to users and stakeholders before end of April 2016.	
2	Summary of changes between OPCS-4.7 and OPCS-4.8 published in line with the schedule provided in the Advance Notification.	
3	SUS and Legally Restricted Patient Confidential data set developers to be made aware of additions /amendments to codes relating to sensitive data items, as necessary.	
4	OPCS-4.8 Information Standards Notice published by end October 2016	
5	Key learning points published to the schedule provided in the Advance Notification.	
6	OPCS-4.8 data files released via TRUD to the schedule provided in the Advance Notification.	
7	OPCS-4.8 eVersion released via TRUD to the schedule provided in the Advance Notification.	
8	Updated National Clinical Coding Standards – OPCS-4.8 reference book released via TRUD to the schedule provided in the Advance Notification.	
9	Hardback classifications made available from the TSO at a specially reduced price for NHS purchasers to the schedule provided in the Advance Notification.	
10	Training needs of clinical coders and other users assessed by September 2016	
11	Core national standard training materials published to the schedule provided in the Advance Notification.	
12	OPCS-4.8 coding queries answered by the Clinical Classifications Service Advisory Service within the terms of the Service Level Agreement.	

## 9 Conformance criteria for the NHS Digital National Casemix Office

#	Conformance	Yes/No
1	HRGs incorporate OPCS-4.8 updates to ensure the codes are accepted in the grouper(s) to be used from April 2017 onwards.	

## 10 Appendix 1: Data Sets that flow OPCS-4 codes

The Data Sets in the NHS Data Model and Dictionary that flow OPCS-4 codes are as follows:
