Glossary of Terms:

Term	Acronym	Definition
Cancer		For the purposes of this standard the term 'cancer' is used throughout the standard and related documents to cover all conditions registerable by the UK and Ireland Association of Cancer Registries.
Chemotherapy Intelligence Unit	CIU	Team responsible for supporting SACT.
Chemotherapy Planning Oncology Resource Tool	C-PORT	Resource management tool
Commissioners		Organisations that plan, purchase and monitor services to meet the health needs of their local population.
The Health and Social Care Information Centre	HSCIC	The Health and Social Care Information Centre is England's central, authoritative source of health and social care information for frontline decision makers, which builds upon the Health and Social Care Act 2012.
International Statistical Classification of Diseases and Related Health Problems	ICD	A medical classification list for the coding of diseases, signs and symptoms, abnormal findings, complaints, social circumstances and external causes of injury or diseases, as maintained by the World Health Organization (WHO). (The title is followed by the revision number, e.g. ICD10 is the tenth revision.)

International Classification of Diseases for Oncology	ICD-O	An extension of the ICD coding system used principally in tumour or cancer registries for coding the site (topography) and the histology (morphology) of neoplasms. (The title is followed by the revision number, e.g. ICD-O-3 is the third revision.)
Improving Outcomes: A Strategy for Cancer	IOSC	The overarching strategy for cancer services in England.
Information Standard	IS	A measure that ensures that information is managed in a consistent manner across health and social care, both by the computers and the staff.
Multi-disciplinary team	MDT	Clinical team that determines patient management
National Cancer Intelligence Network	NCIN	A UK-wide initiative, working to drive improvements in standards of cancer care and clinical outcomes by improving and using the information collected about cancer patients for analysis, publication and research.
National Cancer Registration Service	NCRS	National Cancer Registration System is the merger of the 8 English Cancer Registries into a single organisation, under one director, using a single system (Encore).
The National Institute for Health and Care Excellence	NICE	The National Institute for Health and Care Excellence (NICE) provides national guidance and advice to improve health and social care.
Office of Population Censuses and Surveys	OPCS	OPCS is a procedural classification for the coding of operations, procedures and interventions performed during in-patient stays, day case surgery and some out-patient attendances in the National Health Service (NHS).
Payment by Results	PbR	Commissioning mechanism used to provide a transparent, rules-based system for paying Providers in which efficiency will be rewarded, patient choice supported and activity for sustainable waiting time reductions is encouraged.
Providers		Organisations that provide health services.
Public Health England	Public Health England	Public Health England is an executive agency of the Department of Health in the United Kingdom, taking up its full powers from 1 April 2013 Its role is protecting and improving the nation's health and well being and to reduce inequalities.
Review of Central Returns	ROCR	The Review of Central Returns (ROCR) process is concerned with supporting the Department of Health (DH) and its Arm's Length Bodies (ALBs) to implement the government's policy in 'Reducing the burden' of data collections from the NHS.
Systemic Anti-Cancer Therapy	SACT	The national collection of all cancer chemotherapy data in the NHS in England, which covers all solid tumour and haematological malignancies. This includes all adult and paediatric cancer patients, those in clinical trials, and covers acute inpatient, daycase, outpatient and community settings.
United Kingdom Association of Cancer Registries	UKACR	A body aimed at promoting and developing cancer registration in England, Wales, Scotland, Northern Ireland and the Republic of Ireland.

XML Schema		The documentation, definitions and descriptions required to enable the production and transmission of data for a specific XML language.

2 Change Specification

2.1 New Items

The following data item has been added to the SACT Dataset (version 2.0) from 1st April 2014 in order to comply with general Information Standard rules.

Data item number: 43
Data item section: Demographics and consultant
Data item name: NHS NUMBER STATUS INDICATOR CODE
Data item description / national codes: The NHS NUMBER STATUS INDICATOR CODE indicates the verification status of the NHS number provided.
Format: an2
Data dictionary element: <i>NHS number status indicator code</i>

2.2 Amendments

The following data items have been amended for use within the SACT Dataset (version 2.0) from 1st April 2014. New text is marked in **blue highlight**. Text that has been removed is in ~~red text marked with a strikethrough~~.

Data item number: 12
Data item section: Clinical Status
Data item name: TNM CATEGORY STAGE GROUPING (FINAL PRETREATMENT)
Data item description / national codes: To allow analysis by stage, which is essential for outcome analysis
Format: an5
Data dictionary element: <i>TNM stage grouping (final pretreatment)</i>

Data item number: 13
Data item section: Programme and Regimen
Data item name: PROGRAMME NUMBER
Data item description / national codes: To allow for sequential analysis of patient care, may start at any number to account for previous treatment and is unique to each patient. This also corresponds to the term 'line of chemotherapy' expressed in many prescribing systems.
Format: n2
Data dictionary element: <i>Systemic Anti-Cancer Therapy Programme Number</i>

Data item number: 15
Data item section: Programme and Regimen
Data item name: DRUG TREATMENT INTENT
Data item description / national codes: A Adjuvant N Neoadjuvant C Curative P Palliative D Disease modification
Format: an1
Data dictionary element: <i>Intent of treatment</i>

2.3 Deletions

Not applicable.
